Publication copy with editorial notices, public references and disclosure edits where applicable.

This is a descriptive summary of the original September 2026 provenance record. The early architecture drew on the project objective, specification map and quality standard, controlled reasoning and foundational principles, governance tests, background books, early working notes and a historical Governance Intelligence specification. Those references explain the development of the architecture. Inclusion in the early source record did not grant publication or implementation approval.

The MANIFEST.json at the root of this collection identifies the files actually distributed in v1.0 and their checksums.
